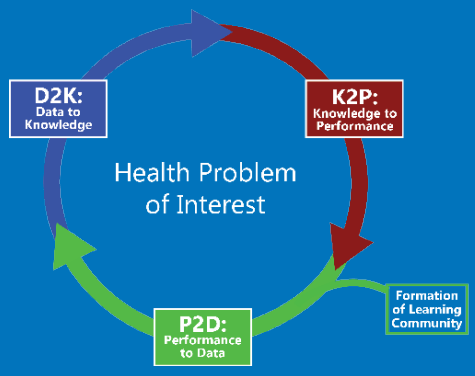
LHS Collaboratory

Putting Data, Knowledge, and Practice into Motion at the University of Michigan



About the Learning Health System (LHS) Collaboratory:

Across the U-M campus, many faculty, students and staff share interest in the concept of a LHS. By creating a campus-wide hub for these interests, the LHS Collaboratory advances interdisciplinary research and promotes the development of learning health systems. Through collaboration, U-M could become the world-wide academic epicenter for the LHS, and the Collaboratory seeks to realize that potential.

Join peers, thought leaders, LHS subject matter experts and others interested in Learning Health Systems at one of these informative events for the Winter 2020 LHS Collaboratory Seminar Series. *Lunch is included.*

"Value Proposition of Learning Health Systems"
Erik Gordon, PhD
Clinical Assistant Professor,
University of Michigan Ross School of Business
February 25, 2020, 12:00-1:30, Palmer Commons
