

30th Reed M. Nesbit Urologic Society & Visiting Professor Meeting

October 15 and 16, 2015

M | UROLOGY

University of Michigan Medical School

The Reed M. Nesbit Urologic Society, founded in 1972, holds an annual meeting for urologists who trained or were affiliated with the University of Michigan Department of Urology. It is open to residents, fellows, faculty and interested community urologists. This year's program focuses on oncology and prostate cancer in particular. Recently there has been some controversy over the role of prostate specific antigen (PSA) in the early screening, detection and treatment and the new developing technology of magnetic resonance imaging as it applies to prostate cancer. Dr. Gerald Andriole, Robert K. Royce Distinguished Professor of Urologic Surgery and Chief, Division of Urologic Surgery at Washington University in St. Louis School of Medicine, is this year's guest professor.

After attending this activity, participants will be able to:

- 1) Define the role of PSA in early detection of prostate cancer.
- 2) Correctly utilize MRI fusion and its application in patients with elevated PSA and prior equivocal biopsies.
- 3) Implement new targeted treatments for advanced, high grade cancer.
- 4) Better prepared on the evaluation, testing and medical & surgical management of neurogenic bladder.
- 5) Understand the statewide urologic care consortium and its impact on statewide surgical outcomes.

The University of Michigan Medical School is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians. The University of Michigan Medical School designates this live activity for a maximum of 7.75 *AMA PRA Category 1 Credit(s)*[™]. Physicians should claim only the credit commensurate with the extent of their participation in the activity.
