Dr. Newman joined the Anatomy faculty at the University of Michigan in 1970 after having received her doctoral degree in anatomy from the Cornell University Graduate School of Medical Sciences. She was well-known for her work on mammalian neuroanatomy and had co-authored the famous textbook Essentials of Clinical Neuroanatomy and Neurophysiology with Dr. Sid Gilman. Dr. Newman’s research on reproductive behavior pathways in the brain was awarded a Javits Neuroscience Investigator Award from NIH, and her career was recognized with a UM Distinguished Faculty Achievement Award in 1995.

Beyond the scope of her remarkable and prolific research, however, Dr. Newman also thrived during her years as Acting Chair of the Department, from 1983 to 1986. Controversy and distress over the emphasis on teaching as opposed to research was growing among members of the Department, and Dr. Newman gracefully navigated the difficulties faced by her colleagues by organizing and presiding over negotiations between the Department and the Medical School. Under Dr. Newman, a compromise that resulted in a new intensive focus on externally-funded research was reached. Her fair and dedicated leadership truly aided the Department during this difficult time, and it is still much appreciated today.

Dr. Newman continues to be very active in the Department and has dedicated countless hours of research and writing to this 160th anniversary celebration. The Department of Anatomy is extremely grateful for her unwavering devotion to both its scientific and administrative elements and we are very fortunate to count Dr. Newman among our Emeriti faculty.

Sarah Winans Newman Lecture

ER contacts sites regulate the structure and function of other organelles

April 27 at 4:00 - 5:00 PM
Reception to follow 5:15 - 6:15 PM

Kahn Auditorium (In-Person & Virtual)
109 Zina Pitcher Place, Biomedical Science Research Bldg
Zoom Meeting link: https://umich.zoom.us/j/91951156709

Gia K. Voeltz, PhD
Professor of Molecular, Cellular, and Developmental Biology, University of Colorado at Boulder.
Howard Hughes Medical Institute

Host by CDB Students

About Sarah Winans Newman

Dr. Newman joined the Anatomy faculty at the University of Michigan in 1970 after having received her doctoral degree in anatomy from the Cornell University Graduate School of Medical Sciences. She was well-known for her work on mammalian neuroanatomy and had co-authored the famous textbook Essentials of Clinical Neuroanatomy and Neurophysiology with Dr. Sid Gilman. Dr. Newman’s research on reproductive behavior pathways in the brain was awarded a Javits Neuroscience Investigator Award from NIH, and her career was recognized with a UM Distinguished Faculty Achievement Award in 1995. Beyond the scope of her remarkable and prolific research, however, Dr. Newman also thrived during her years as Acting Chair of the Department, from 1983 to 1986. Controversy and distress over the emphasis on teaching as opposed to research was growing among members of the Department, and Dr. Newman gracefully navigated the difficulties faced by her colleagues by organizing and presiding over negotiations between the Department and the Medical School. Under Dr. Newman, a compromise that resulted in a new intensive focus on externally-funded research was reached. Her fair and dedicated leadership truly aided the Department during this difficult time, and it is still much appreciated today.

Dr. Newman continues to be very active in the Department and has dedicated countless hours of research and writing to this 160th anniversary celebration. The Department of Anatomy is extremely grateful for her unwavering devotion to both its scientific and administrative elements and we are very fortunate to count Dr. Newman among our Emeriti faculty.
