PROGRAM OBJECTIVES

This seminar will summarize presentations made at the 66th American Association for the Study of Liver Diseases (AASLD) meeting held in Boston in November 2016. New information regarding the management of hepatitis C, fatty liver disease, liver cancer, and complications of portal hypertension and cirrhosis will be presented. In addition, case-based discussions on the current approach to patients with hepatitis C and patients with advanced liver disease will be provided.

At the conclusion of this seminar, participants will be able to implement:

- the latest developments in the diagnosis and treatment of chronic hepatitis B and C.
- the identification of the natural history and treatment of patients with fatty liver disease and alcoholic liver disease.
- the appropriate management approach for patients with hepatocellular carcinoma including the use of resection and transplantation.
- manifestations and treatment of complications of portal hypertension in patients with cirrhosis including bleeding, ascites, and hepatic encephalopathy.

TARGET AUDIENCE

This course is directed to family and general practitioners, gastroenterologists, internists, and other primary care providers including nurse practitioners and physician assistants interested in expanding their knowledge of clinical hepatology.

COURSE BACKGROUND

The Liver Disease Wrap-up CME course has been a well-received educational forum for practicing physicians wanting to keep up with the latest developments in clinical hepatology. Experienced faculty from the University of Michigan, Division of Gastroenterology provide a mix of clinical research findings along with case-based learning in this program.

COMMENTS FROM PAST ATTENDEES

"Great course and update on hot topics in hepatology."

"Great way to brush up on the latest advances in a user-friendly way."

"Excellent review. Timely and concise!"

"I always come away with practical management information that I can implement in patient care immediately."

DEPARTMENT OF INTERNAL MEDICINE

Division of Gastroenterology

www.med.umich.edu/gi

The Division of Gastroenterology is one of the largest gastroenterology practices in the country and is a leader in the prevention, diagnosis, and treatment of diseases of the gastrointestinal tract and liver. Our 60-plus physicians are experts in the diagnosis and treatment of all diseases of the gastrointestinal system, from simple to complex, including those of the esophagus, stomach, small intestine, colon, rectum, liver, gallbladder, pancreas, and biliary tract.

In addition to being leaders in clinical care, our faculty are also leaders in their respective areas of research. These include such varied interests as the role of peptides in the brain-gut interactions in functional bowel diseases, to innovative treatments of viral hepatitis and liver cancer.

The Gastroenterology Division has created the following subspecialty clinics to better direct our clinical expertise to meet the needs of referring physicians and their patients:
