Chester J. Koh, MD, FACS, FAAP
Professor of Urology, Pediatrics, and OB/GYN
Texas Children’s Hospital
Baylor College of Medicine

"Minimally Invasive/Robot-assisted Laparoscopic Surgery in Children: Where We Are in 2019"

Target audience – urologists and general pediatric providers within the University of Michigan Health System as well as within the state of Michigan.

Following this activity, participants will understand and be able to implement into daily practice the following:

- Describe the evolution of minimally invasive/robot-assisted laparoscopic surgery in children over the past two decades
- Describe the common uses of robot-assisted laparoscopic surgery in children
- Review new robot platforms that may impact the future of minimally invasive surgery in children

To register, or for more information, contact Leslie Simmons at (734) 615-3038 or lasim@med.umich.edu
