3rd Annual
UNIVERSITY OF MICHIGAN
NEUROSCIENCE CONFERENCE

50th Anniversary of the
U-M Neuroscience Graduate Program

MAY 5 @ 5 P.M. - NCRC BUILDING 18 DINING HALL
MAY 6 @ 8:30 A.M. - BSRB KAHN AUDITORIUM

Presented by:
Thursday, May 5 - Welcome, Alumni and guests!

NGP 50th CELEBRATION RECEPTION AND DINNER
This event will be held in NCRC Building 18 dining hall and the adjacent hallway

• 5:00 P.M. Cocktails/Poster Session
• 6:45 P.M. Introductions, slide show
• 7:00 P.M. Seated Dinner
• 8:00 P.M. Keynote Speaker

Past program leadership

Gary E. Landreth, Ph.D.
Martin Professor of Alzheimer’s Research
Indiana University
Member, 1st Neuroscience Graduate Program Cohort

Dorothy, we’re not in Kansas anymore... and other things learned along the way in life and science

About the Program
The U-M Horace H. Rackham School of Graduate Studies’ Executive Board approved the creation of an interdepartmental Neuroscience Graduate Program (NGP) on March 24, 1971, making it the longest standing program of its kind in the country.

There are more than 270 NGP alumni working in an array of disciplines, including academic research, industrial research and development, academic medicine and biotechnology.

Past program leadership

Lester Rutledge Stephen Easter Terry Robinson Pamela Raymond Huda Akil Michael Uhler Richard Hume

Peter Hitchcock Steve Maren Ed Stuenkel Audrey Seasholtz Les Satin Arun Anantharam Carol Elias
# NEUROSCIENCE CONFERENCE PROGRAM

This event will be held in BSRB Kahn Auditorium. Breakfast and breaks will be in the ABC Conference rooms.

About our Partners:

MICHIGAN NEUROSCIENCE INSTITUTE

The brain is the most complex organ in the human body. Understanding its complexities – both normally and in disease – requires teams of scientists employing a broad range of research methods. The Michigan Neuroscience Institute (MNI) brings together investigators from across the University of Michigan campus to probe the mysteries of the brain on a cellular, molecular, and behavioral level. MNI cultivates a collaborative, inclusive, and diverse environment to support established neuroscientists and those in training as they strive to better understand the nervous system and to, ultimately, improve lives.

U-M NEUROSCIENCE GRADUATE PROGRAM

In 1971, the University of Michigan established its Neuroscience Graduate Program (NGP), making it the longest-standing neuroscience graduate program in the United States. Over the past 50 years, 270+ alumni have received their Ph.D. in Neuroscience and now share their talents and expertise in academia, industry, non-profit, and government organizations, to name a few. The NGP promotes interactions between faculty and students, making it the nexus of the neuroscience community.

U-M NEUROSCIENCE INNOVATORS

The Michigan Neuroscience Innovators is a forum initiated by young investigators to foster collaborative and innovative research across the University of Michigan neuroscience community. Using the latest tools, techniques and approaches, Michigan Neuroscience Innovators scientists are generating new knowledge about the brain at many levels, from single cells and circuits, to the whole brain. Their efforts are shedding light on how brains develop and change over time, and simultaneously unraveling the processes that underlie memory, behavior and even consciousness.
