The mission of the Center for Cell Plasticity and Organ Design is to unite interdisciplinary research efforts towards understanding the basic mechanisms by which organs and tissues are formed and maintained and to use this knowledge to regenerate or create replacement tissues and organs, improve stem cell therapies and effective organ transplantation systems that will correct acquired and genetic human disease.

The Center’s target audience consist primarily of faculty, graduate and postdoctoral students from the University of Michigan and the domestic and international research, academic, and medical communities.

**Design Preferences:**

- We would like a Modern/Classic Logo.
- We would like a logo that is aesthetically bold on Social Media platforms, event announcement promotional materials, letterhead, and reports.
- We are open to color schemes. The logo should stand on its own but keeping in mind that it should complement the Michigan Medicine/University of Michigan logo/brandings as we produce promotional materials that have these logos present.
- You may go to Events/Seminars on the CPOD Website to view Archived Flyers to see what we have used in the past.

**Criteria for Participation:** Student currently enrolled at the University of Michigan

To apply, please e-mail your resume and portfolio to Tamika Mohr, Center Administrator  organogenesis@umich.edu

Applications are due Monday, October 19, 2020 by 5:00 pm
