#HeForShe: Why it Matters to the Individual (and to Everyone)

In order to gain complete parity, we need our male colleagues’ aid.

#HeForShe Tips
- Call everyone doctor
- Teach with understanding
- Be thoughtful with evaluations & letters of recommendation
- Quell sexist talk & conversation
- Check in on your biases regularly
- Provide an open invitation to women in surgery

In the end, #HeForShe isn’t a personal issue or even a woman’s issue—it’s a human issue. Our patients deserve us at our best and our best is a working environment that not just accepts diversity but one that expects and demands equality and acceptance.
