About the Cover

Jennifer Gehret McCarthy, Ph.D. (BioChem 2012)

The marine environment, full of bioactive natural products, is largely untapped. Natural products, including those found in the marine environment, exhibit an impressive array of chemical diversity and often potent bioactivity, which can be harnessed for therapeutics. Many unusual enzymes reside in natural product assembly-line pathways, and create the diverse collection of chemical functional groups found in natural products. The study of enzymes in natural product biosynthetic pathways can reveal new modes of catalysis, unique chemical transformations, and novel biosynthetic tools. The antimitotic natural product curacin A is a perfect example of interesting chemistry found in the marine environment.

Curacin A (center), produced by the marine cyanobacterium *Moorea producens* (background), contains many interesting chemical groups including cyclopropane and thiazoline rings, an internal cis double bond and a terminal alkene. Equally interesting are the structural details of the biosynthetic pathway that produces curacin A (arrows), giving insight into how each unique chemical group is made. Shown are the published structures from the curacin A biosynthetic pathway (starting from the top left and moving counter clockwise): a dehydratase that produces a trans double bond\(^1\), a dehydratase that produces a cis double bond\(^1\), an acyl carrier protein involved in cyclopropane biosynthesis\(^2\), a loading enzyme with dual decarboxylase and acetyltransferase activities\(^3\), an Fe\(^{2+}\)/α-ketoglutarate dependent halogenase involved in cyclopropane biosynthesis\(^4\), a decarboxylase that establishes regiochemistry for cyclopropane formation\(^5\), a dehydratase that produces a trans double bond\(^1\), and a β-sulfate specific thioesterase that produces a terminal alkene\(^6\).

MASTERS PROGRAM ADMINISTRATION

Master’s Program Directors  Dr. Alex Ninfa (734) 763-8065; aninfa@umich.edu
Dr. Michael Uhler (734) 647-3188; muhler@umich.edu

Graduate Programs Manager  Ms. Beth Goodwin (734) 764-8594; egoodwin@umich.edu

PROGRAM OVERVIEW

The Department of Biological Chemistry offers one-year Masters Programs designed to broadly train tomorrow’s leaders in biomedical sciences. Our trainees are well prepared for employment in industry, or matriculation into elite graduate or medical programs. Two tracks of study are offered, depending upon the goals and interests of the students.

**Masters in Biochemistry-Research Track:** This one-year program of didactic coursework in biochemistry includes an intensive research experience and a written thesis. This program is intended for individuals seeking to increase their skills and research experience for employment opportunities, or for application to highly competitive Ph.D. or medical professional degree programs.

The intensive research experience is a key feature of the research-track. Our faculty members conduct research at the cutting edge of modern biochemistry and molecular biology. Current areas of research include structural biology, protein biochemistry, enzyme reaction mechanisms, molecular genetics, signal transduction, neurobiology, cell and developmental biology, and bioinformatics. Students match with faculty research advisors by mutual consent, either before arrival on campus or immediately thereafter. The capstone of the research experience is the thesis dissertation.

**Masters in Biochemistry-Coursework Track:** This one-year program of didactic coursework in biochemistry and related fields is designed for students who plan to attend medical, dental, veterinary, law, or other professional programs. Students on this track take two semesters of rigorous, graduate-level, coursework. In addition, students will conduct a mentored literature review in a selected area of interest, working one-on-one with a research faculty, and culminating in a short but scholarly review article. Students on this track are exposed to an impressive array of modern research through seminar programs, a critical analysis course, and interactions with our faculty, and are well prepared to succeed in professional programs.

CURRICULUM

Coursework in both tracks consists of required and elective components. To maintain academic standing, advance to the second semester of the program, and to be awarded the M.S. degree, a B- or better is required in all coursework. Students experiencing difficulty in any course should contact the Master’s Program Directors early in the term and tutors can be identified to assist the M.S. students.
Master's Graduate Curriculum - Research Track

A. Biological Chemistry Required Course:
   BIOCHEM 660* Molecules of Life: Protein Structure, Function & Dynamics (3 Cr, F)
   *For students with advanced standing in biochemistry (e.g. biochemistry UG degree)

B. Biological Chemistry Advanced Electives (2 Credits minimum):
   Fall
   BIOCHEM 650 Eukaryotic Gene Transcription (2 Cr, F)
   BIOCHEM 690 Biochemical Regulatory Mechanisms (2 Cr, F)
   Winter
   BIOCHEM 640 Regulatory RNA and Control of Gene Expression (2 Cr, W)
   BIOCHEM 528 Biology and Chemistry of Enzymes (2 Cr, W)
   BIOCHEM 673 Enzyme Kinetics (3 Cr, W)
   BIOCHEM 602 Protein Crystallography (3 Cr, W)

C. Additional required courses:
   BIOCHEM 597 Critical Analysis (3 Cr, W)
   BIOCHEM 712 Biological Chemistry Seminar Series (1 Cr F/ 1 Cr W)
   BIOCHEM 711 Graduate Seminar (1 Cr F/ 1 Cr W)
   BIOCHEM 600 Independent Research (6-8 Cr F/ 6-8 Cr W)
   PIBS 503 Research Responsibility & Ethics (1 Cr, F)

D. Electives** (3 Cr minimum):
   Fall
   BIOINF 527 Introduction to Bioinformatics and Computational Biology (4 Cr, F)
   BIOINF 528 Advanced Applications of Bioinformatics (3 Cr, F)
   BIOPHYS 520 Biophysical Chemistry I (Methods and Techniques) (3 Cr, F)
   BIOSTAT 501 Introduction to Biostatistics (4 Cr, F)
   BIOSTAT 521 Applied Biostatics (4 Cr, F) [calculus prerequisite]
   CDB 530 Cell Biology (3 Cr, F)
   CDB 581 Developmental Genetics (3 Cr, F)
   HUMGEN 541 Molecular Genetics (3 Cr, F)
   PHYSIOL 502 Human Physiology (4 Cr, F)
   Winter
   BIOINF 524/525 Foundations in Bioinformatics & Systems Biology (3 cr 524/525 3 modules, 1 Cr each, W)
       BIOPHYS 521 Biophysical Chemistry II (Theories) (3 Cr, W)
   CDB 550 Histology (4 Cr, W)
   CDB 582 Stem cells: Organogenesis to Regenerative Biology (3 Cr, W)
   CHEMBIO 502 Chemical Biology II (3 Cr, W)
   MICRBIOL 504 Cellular Biotechnology (3 Cr, W)
   PATH 581 Tissue, Cellular and Molecular Basis of Disease (3 Cr, W)

**This is a partial list. Consult your research mentor & academic advisor if you would like to take an elective course or courses not listed above.

E. Research:
   Fall and Winter
   BIOCHEM 600 Independent Study (Master’s thesis research) (6-8 Cr F/ 6-8 Cr W)

A typical credit load is 14-15 credits per term with a minimum of 29 credits, including 4 cognate credits, and development and completion of a written thesis.
Thesis and Thesis Advisory Committee – Research Track

Thesis research will be done in the Fall and Winter terms and culminate in the writing of a Master’s Thesis. The thesis is expected to be a synthesis of scholarly background and discussion of the research project, in addition to an original experimental or theoretical contribution to the field. By the end of October, students are expected to form their Thesis Advisory Committee, composed of the research advisor and two additional Biological Chemistry faculty members. By the end of November, students are expected to meet with their Advisory Committee. The student should provide an overview of the research project, summarize progress to date, provide an outline of planned experiments and a timeline for completion of the dissertation. Monthly consultation with the Master’s Program Directors is also expected. A second meeting of the thesis committee is required during the Winter term and it is expected that the research will be accomplished by the end of the academic year in most cases, with the written thesis submitted no later than the end of Spring/Summer term. The student’s Advisory Committee will evaluate the submitted thesis. The Master’s degree will not be awarded until all required revisions are completed and approved by the Chair of the committee, the Department, and the Rackham Graduate School.

Key Dates - Research Track

Throughout fall and winter terms, attend lab meetings and seminars/symposia recommended by your research mentor. Talk to your research mentor about work/research expectations.

- Sep 15 Apply for Rackham Research Grant
  https://rackham.umich.edu/funding/funding-types/rackham-graduate-student-research-grant-2/
  (List Anne Vojtek avojtek@umich.edu as Departmental Program Chair, and Beth Goodwin
  egoodwin@umich.edu as Graduate Coordinator on the online application)

- Oct 30 Form Thesis Committee and submit form to Beth at egoodwin@umich.edu

- Nov 27 Schedule your first committee meeting prior to Thanksgiving break.
  - Send an abstract to your committee members by email at least two days prior to your scheduled meeting.
  - Prepare a powerpoint presentation for your committee meeting:
    - Introduction of research topic
    - Outline your goals
    - Present hypothesis
    - Discuss experimental plans and data
  - Provide a draft of your presentation to your research mentor at least one week prior to your committee meeting and meet with him or her to get input on the presentation.

- Dec 11 Departmental Poster Session (date to be confirmed)

- Jan 29 Submit a draft of your thesis introduction to mentor; copy egoodwin@umich.edu

- Feb 15 Convene your second thesis committee meeting. Submit mtg progress form to egoodwin@umich.edu

- Apr 1 Submit experimental chapters to mentor; copy egoodwin@umich.edu
  (For consideration of May degree)

- Apr 17 Research Track Symposium (date to be confirmed)

- May 15 Submit experimental chapters to mentor; copy egoodwin@umich.edu
  (For consideration of August degree)
Master's Graduate Curriculum - Course Track

A. Biological Chemistry Required Course:
   BIOLCHEM 660* Molecules of Life: Protein Structure, Function & Dynamics (3 Cr, F)
   *For students with advanced standing in biochemistry (e.g. biochemistry UG degree)

B. Biological Chemistry Advanced Electives (6 Credits minimum):
   Fall
   BIOLCHEM 650 Eukaryotic Gene Transcription (2 Cr, F)
   BIOLCHEM 690 Biochemical Regulatory Mechanisms (2 Cr, F)

   Winter
   BIOLCHEM 640 Regulatory RNA and Control of Gene Expression (2 Cr, W)
   BIOLCHEM 528 Biology and Chemistry of Enzymes (2 Cr, W)
   BIOLCHEM 673 Enzyme Kinetics (3 Cr, W)
   BIOLCHEM 602 Protein Crystallography (3 Cr, W)

C. Additional required courses:
   BIOLCHEM 597 Critical Analysis (3 Cr, W)
   BIOLCHEM 712 Biological Chemistry Seminar Series (1 Cr F/ 1 Cr W)
   BIOLCHEM 711 Graduate Seminar (1 Cr F/ 1 Cr W)
   BIOLCHEM 601 Tools for Scientific Research (3 Cr, W)
   BIOLCHEM 603 Independent Literature Research (3 Cr W)
   PIBS 503 Research Responsibility & Ethics (1 Cr, F)

D. Electives** (6 Cr minimum):
   Fall
   BIOINF 527 Introduction to Bioinformatics and Computational Biology (4 Cr, F)
   BIOINF 528 Advanced Applications of Bioinformatics (3 Cr, F)
   BIOPHYS 520 Biophysical Chemistry I (Methods and Techniques) (3 Cr, F)
   BIOSTAT 501 Introduction to Biostatistics (4 Cr, F)
   BIOSTAT 521 Applied Biostastics (4 Cr, F) [calculus prerequisite]
   CDB 530 Cell Biology (3 Cr, F)
   CDB 581 Developmental Genetics (3 Cr, F)
   HUMGEN 541 Molecular Genetics (3 Cr, F)
   PHYSIOL 502 Human Physiology (4 Cr, F)

   Winter
   BIOINF 524/525 Foundations in Bioinformatics & Systems Biology (3 cr 524/525 3 modules, 1 Cr each, W)
   BIOPHYS 521 Biophysical Chemistry II (Theories) (3 Cr, W)
   CDB 550 Histology (4 Cr, W)
   CDB 582 Stem cells: Organogenesis to Regenerative Biology (3 Cr, W)
   CHEMBIO 502 Chemical Biology II (3 Cr, W)
   MICRBIOL 504 Cellular Biotechnology (3 Cr, W)
   PATH 581 Tissue, Cellular and Molecular Basis of Disease (3 Cr, W)

**This is a partial list. Consult your research mentor and academic advisor if you would like to take an elective course or courses not listed above.
Literature Analysis & Review Article - Course Track

Course track MS students will take an advanced literature analysis course (Biolchem 603), in which each student will focus on an important area of current research, review the research literature in that area in depth, and analyze this research thoroughly. Each student will produce a concise and impactful review of the subject, complete with thoughtful suggestions for future directions, suitable for publication. In the course of preparing the review, the student will become expert in the literature of the chosen area.

The preparation of these reviews will be supervised by the course track faculty mentor. Each student is expected to meet formally with their mentor each week, or more as deemed necessary, so that the mentor may guide the work, and additional contact by email will frequently occur for communication of draft versions, background papers, and notes. Monthly consultation with the Master’s Program Directors is also expected. During the preparation of manuscripts, both the mentor and the student may need to consult with additional faculty members to obtain expert opinions.

A typical credit load is 14-15 credits per term with a minimum of 29 credits, including 4 cognate credits.

Key Dates – Course Track

Sep 15  Identify Mentor and send name to Beth at egoodwin@umich.edu
Sep 30  Student Mentor Agreement Form Due. Provide Beth with a copy at egoodwin@umich.edu
Dec 1  Outline of Paper Due – submit to your Mentor and copy the Program Directors aninfa@umich.edu and muhler@umich.edu
Jan – Apr  Present your 711 Seminar
Jan 29  Submit draft of Introduction to your mentor (copy Beth
Mar 30  Submit draft of entire paper to your mentor and the Program Directors aninfa@umich.edu and muhler@umich.edu
Apr 10  Course Track Symposium (date to be confirmed)
April 21  Submit Final Version of your paper to your mentor and the Program Directors; copy Beth aninfa@umich.edu and muhler@umich.edu
            egoodwin@umich.edu
RACKHAM AND BIOLOGICAL CHEMISTRY ACADEMIC POLICIES
Students in the program are expected to familiarize themselves with Rackham’s Academic Policies including the Academic and Professional Integrity Policy (see http://www.rackham.umich.edu/policies/gsh/) and the “Compact of UM-Biochemistry Graduate Student Commitments” (see page 9).

ACADEMIC PERFORMANCE
The Rackham Graduate School requires students to maintain a grade point average of B (3.0 on a 4.0 scale) and the Department of Biological Chemistry requires all students to receive grades no lower than a B- in required courses. A student whose cumulative GPA falls below a B, who is not making satisfactory progress toward the degree, or who is failing to demonstrate an ability to succeed in his or her plan of studies, may be denied permission to register, required to withdraw, or dismissed from the program. The Biological Chemistry Graduate Program Committee will review the student’s progress and make the determination as to whether the student can continue in the program. Students must be in good academic standing to submit a written thesis for evaluation.

BIOLOGICAL CHEMISTRY SEMINAR SERIES
The Department of Biological Chemistry sponsors a weekly seminar program during the Fall and Winter terms that attracts outside speakers of international reputation. The seminars are held each Tuesday at Noon and all biochemistry students are required to attend. Students are invited to share lunch and conversation with the speaker following the seminar. In addition to the weekly seminar program, the Department sponsors an annual Distinguished Alumni Lecture and five endowed lectureships: the Irwin Goldstein Lectureship in Glycobiology, the G. Robert Greenberg Lectureship in Biological Chemistry, the William E.M. Lands Lectureship in the Biochemical Basis for the Physiology of Essential Nutrients, and the Martha L. Ludwig Lectureship in Structural Biology, and the Rowena Matthews Lectureship in Biological Chemistry.

FALL POSTER SESSION
Research track students will present their research at a poster session held at the conclusion of the Fall term. Course track students will also present a poster as part of the BC 601 course near the end of the Fall term.

STUDENT CHALK TALKS
Students in the Department of Biological Chemistry meet approximately twice each month for lunch, conversation, and an informal research talk. This gathering provides an opportunity for students to keep in touch with their colleagues and to share scientific expertise and advise. The chalk talk schedule can be found on our website.

WORK HOURS AND VACATION GUIDELINES
Students should consult with their mentors regarding specific laboratory policies on research hours, vacations, and planned absences. Request for time off from research must be done in advance and in consultation with the student’s mentor.

DEPARTMENT SOCIAL EVENTS
Annual Departmental Retreat
The student-organized Biological Chemistry retreat, held at the beginning of the Fall semester at Kellogg Biological Station on Gull Lake in Western Michigan, provides students, postdoctoral fellows and faculty an opportunity to present and discuss research in a relaxed and informal setting.

Monthly Happy Hour
Once a month, members of the department are invited to gather together at a local establishment in Ann Arbor to enjoy conversation and appetizers.

Mentoring Plan
UM-Biochemistry Graduate Student Commitments

- I acknowledge that I have the primary responsibility for the successful completion of my degree. I will be committed to my graduate education and will demonstrate this by my efforts in the classroom and the research laboratory. I will maintain a high level of professionalism, self-motivation, engagement, scientific curiosity, and ethical standards.

- I will meet regularly with my mentor and provide him/her with updates on the progress and results of my activities and/or experiments.

- I will work with my mentor to develop a thesis project or paper. This will include establishing a timeline for each phase of my work. I will strive to meet the established deadlines.

- I will be knowledgeable of the policies and requirements of my graduate program, Rackham Graduate School and the University of Michigan. I will commit to meeting these requirements.

- I will work together with my mentor and the program directors to fulfill all program requirements according to my graduate program guidelines. I will be responsive to the advice of and constructive criticisms from my mentor and directors.

- I will attend and participate in laboratory meetings, seminars and journal clubs that are part of my educational program.

- I will comply with all UMMS and Rackham Graduate School policies, including academic program milestones. I will comply with both the letter and the spirit of all institutional safe laboratory practices and animal use and human-research policies at my institution.

- I will participate in the UM Responsible Conduct of Research Training Program (PIBS 503) and practice those guidelines in conducting my research.

- I will be a good departmental and laboratory citizen. I will agree to take part in shared laboratory responsibilities and will use laboratory resources carefully and frugally. I will maintain a safe and a clean laboratory space. I will be respectful of, tolerant of, and work collegially with all departmental personnel.

- I will maintain a detailed, organized, and accurate research notebook. I am aware that my original notebooks and all tangible research data are property of my institution but that I am able to take a copy of my notebooks with me after I complete my thesis.

- I will discuss policies on work hours, sick leave and vacation with my mentor. I will consult with my mentor and notify fellow lab members in advance of any planned absences.

- I will discuss policies on authorship with my mentor. I will work with my mentor to submit all relevant results in a timely manner prior to my graduation.

- I acknowledge that it is primarily my responsibility to develop my career following the completion of my degree. I will seek guidance from my research advisor, dissertation committee, other mentors and any department resources available for advice on career plans.
