“What’s New in Patient-Reported Outcomes Following Treatment for Localized Prostate Cancer”
7:00-8:00am Urology Grand Rounds
2C108 University Hospital near Ford Auditorium, 1500 E. Medical Center Drive, Ann Arbor

“Prostate Cancer Screening: How Did We Get Here and Where Do We Go Next?”
9:00-10:00am Presentation Followed by Urologic Oncology Faculty/Fellow Presentations
NCRC Research Auditorium, Building 10, 2800 Plymouth Rd, Ann Arbor

Dr. Penson obtained his MD from Boston University and completed his urology residency at UCLA Medical Center in Los Angeles. He then was awarded a Robert Wood Johnson Clinical Scholar fellowship at Yale University and also obtained an MPH at Yale. He currently maintains a clinical practice in urologic oncology at the Vanderbilt-Ingram Cancer Center.

His specific research interests include the comparative effectiveness of treatment options in localized prostate cancer and the impact of the disease and its treatment on patients’ quality of life. He previously chaired the National Institutes of Health’s Health Services Outcomes and Delivery study section, which reviews almost all health services research grants submitted to the NIH. He also maintains a strong interest in health policy and quality improvement.

He currently serves as Chair of the American Urological Association’s Science and Quality Council and has previously served on the National Advisory Council of the US Agency for Healthcare Research and Quality and the American College of Surgeons Commission on Cancer.

Dr. Montie received his MD in 1971 from the University of Michigan. He completed his urologic surgery residency at the Cleveland Clinic Foundation in 1976, and after two years in the Air Force, proceeded to Memorial Sloan-Kettering Cancer Center in 1978 to study urologic oncology. After stints at the Cleveland Clinic and Wayne State University, in 1995 he joined the University of Michigan with the rank of Professor of Surgery and was awarded the Valassis Professor of Urologic Oncology the following year. He was promoted to Head of the Section of Urology in 1997 and was Founding Chairman of the Department of Urology in 2001—a position he held until 2007. He was a co-principal investigator in the University of Michigan Specialized Program of Research Excellence (SPOR) in prostate cancer from 2000-2012. He is a founding member and past president of the Society of Urologic Oncology, a member of the American Association of Genitourinary Surgeons and the Clinical Society of Genitourinary Surgeons.

In 2005, he established the Division of Health Services Research (HSR) at the University of Michigan. This has grown to be the largest and arguably most prominent Urologic HSR group in the world. He is a founding co-director of the Michigan Urologic Surgery Improvement Collaborative (MUSIC), which contributes prospective data on quality improvement interventions for prostate cancer care. In 2016, he was awarded the Lifetime Achievement Award from the AUA and the Distinguished Mentor Award, Michigan Institute for Clinical and Health Research, University of Michigan.
