
Presented by:

Jennifer R. Rider, ScD, MPH
Assistant Professor
Department of Epidemiology
Boston University School of Public Health

Dr. Rider is a cancer epidemiologist and Assistant Professor in the Department of Epidemiology at the Boston University School of Public Health. Her research focus is primarily on prostate cancer, but also includes studies of penile cancer and tumors of the head and neck. She is interested in the role of modifiable lifestyle factors in cancer development and progression, as well as the identification of tumor biomarkers that can improve disease management. Dr. Rider is in epidemiologic methods, biomarker validation, and the use of surrogate endpoints in oncology studies.
