

***Intra-arterial Chemotherapy for Retinoblastoma
 in Siena, Italy***

*Andrew Stacey, MD
 Kellogg Eye Center*

The Siense retinoblastoma team: Sonia De Francesca , MD (far left), three ophthalmology residents and nurses., Andrew Stacey, MD (the tall guy), Doris Hadjistilianou, MD, the chief, and two oncology physicians.

The University of Siena Hospital

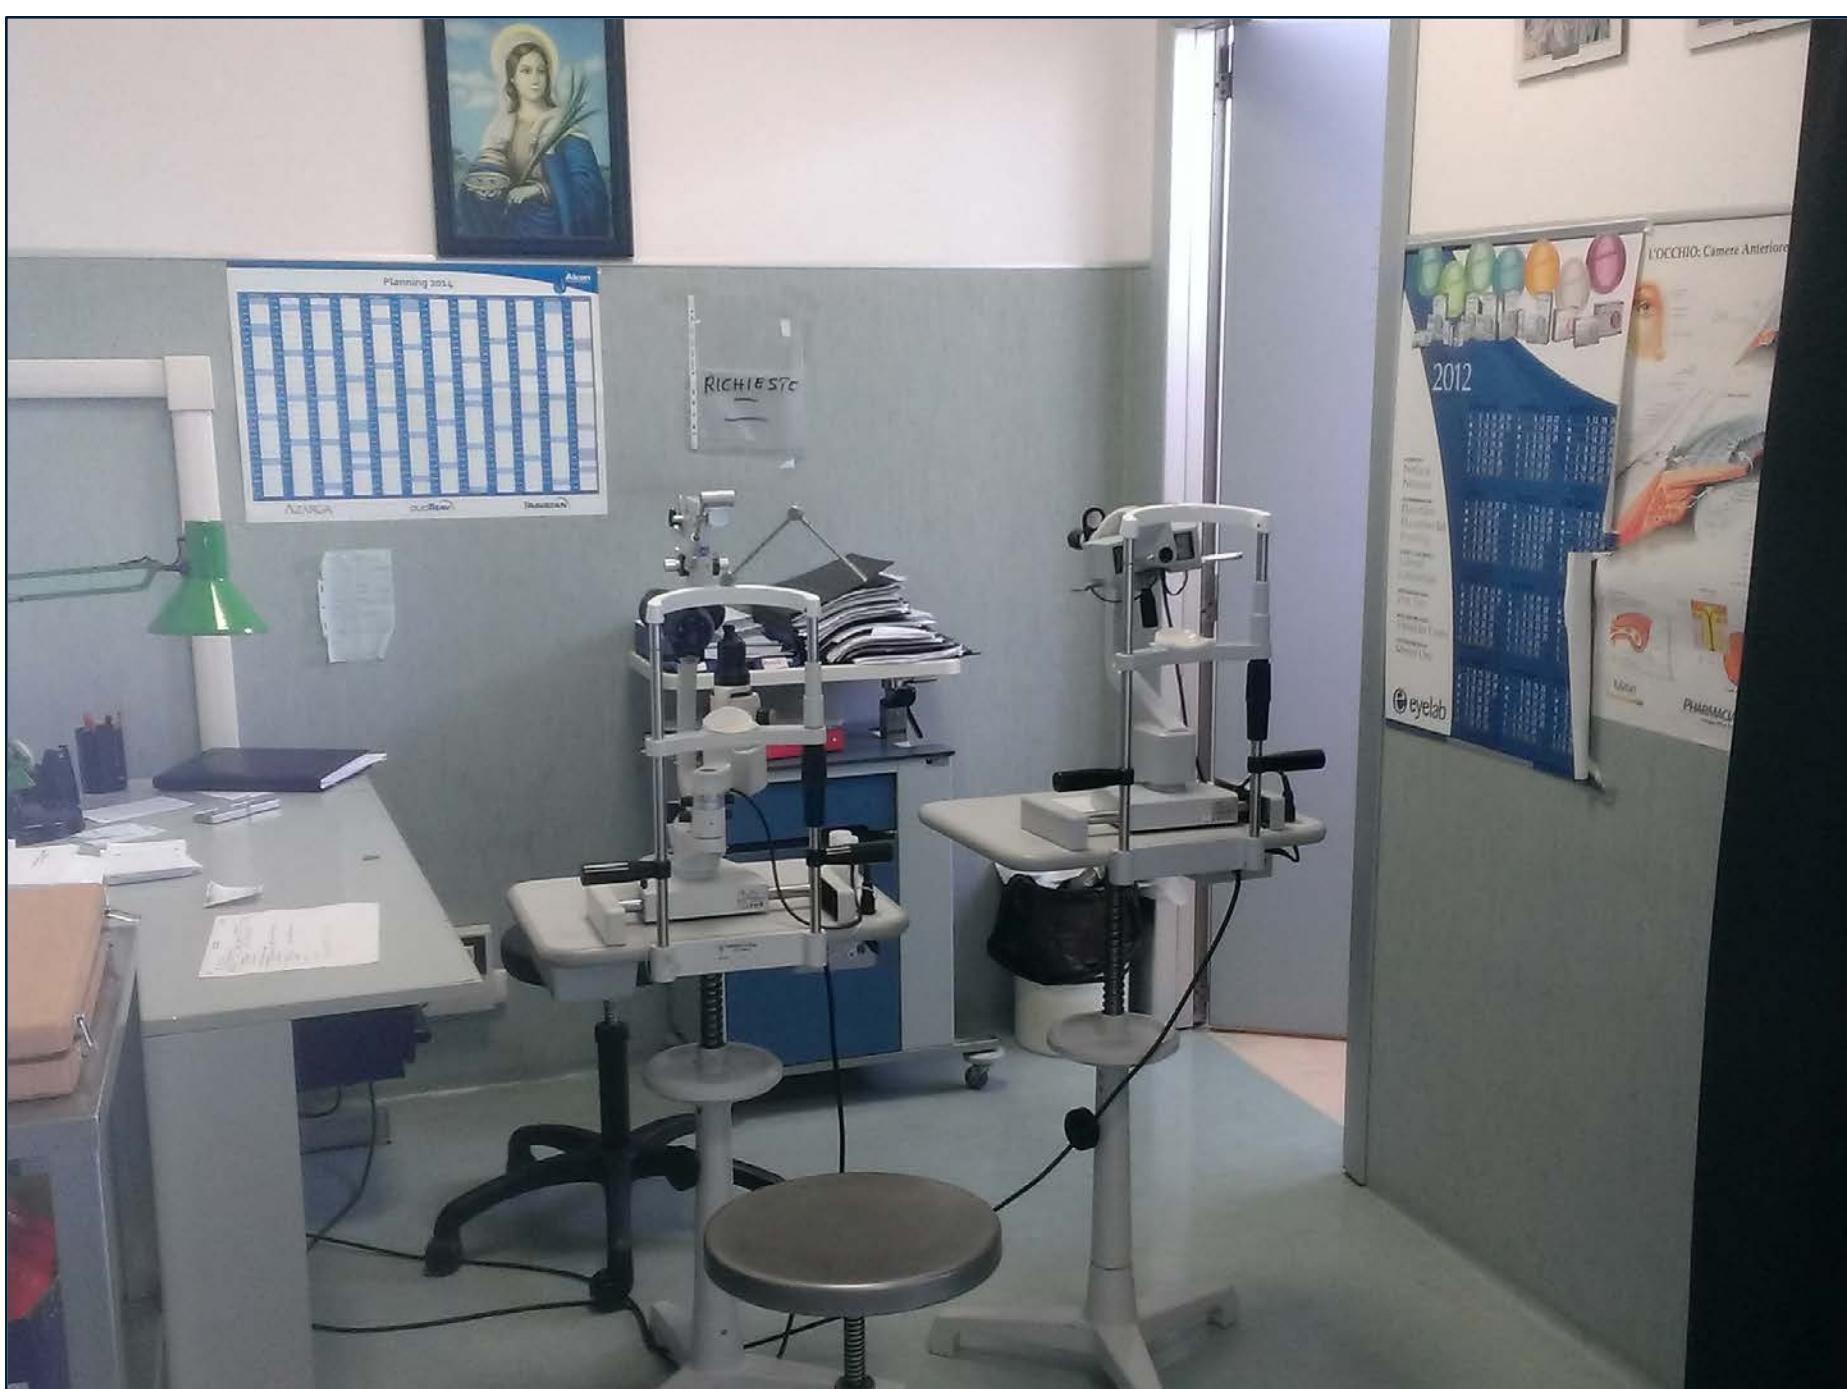

The ophthalmology "waiting room" at the University of Siena. There is jockeying for position in the waiting line.

An older child puts herself to sleep prior to an exam under anesthesia.

Same child, now asleep. Leukocoria was detected with a mobile leukocoria detection device.

This single exam room is the International Retinoblastoma Referral Center.

View of the Tuscan countryside along the bike path from hotel to the hospital.
