Three-Four Line Summary of Project

Funding *(please provide current internal and external funding sources for the project).*

SHARING: I agree to the UMCGR Core listing the plasmids, viruses, mouse models, etc. that were subsidized with GI Center funds for other Center members to view. The information will be added to databases of potential reagents to be shared to facilitate interactions among Center members. Pre-publication sharing of reagents would be at the investigator's discretion. The lists will not be open to outside viewing.
