University of Michigan and University of Copenhagen conclude first CopMich Urology Symposium

The first symposium, which has plans to become an annual event, was hosted in at the Hotel Scandic in Copenhagen, Denmark and featured speakers from both schools. The symposium touched on a wide range of topics, covering everything from oncology to fertility, even discussing the role of nurse practitioners.

The University of Michigan's ongoing partnership with the University of Copenhagen is active in collaboration between Dr. Dana A. Ohl, Chief of Michigan Urology's Division of Andrology and Urologic Health (AUH) and Dr. Jens Sønksen, Professor at the University of Copenhagen and Head of Urological Research Center and Andrology, Herlev Hospital, Denmark.

AUH's Dr. John Wei and other Urology faculty develop new test to detect prostate cancer

The Mi-Prostate Score, otherwise known as MiPS, uses urine samples to offer improved detection of prostate cancer over traditional screening methods.

U-M Urologists respond to release of 'Surgeon Scorecard'

•••

U.S. News and World Report published an editorial written by Drs. Khurshid Ghani, James Montie and David Miller on the pros and cons of a "Surgeon Scorecard" developed and released by ProPublica, an investigative journalism group.

The release of the rankings, which specified surgeon-specific outcomes for eight different elective procedures, engendered strong reactions from both proponents and opponents of the scorecard. U.S. News and World Report felt the U-M Urologists' response presented an even-handed assessment of the effort by ProPublica.
