Michigan Urology travels to Ghana to deliver care and education

Dr. John Park, Chief of Michigan Urology's Division of Pediatric Urology, and Ryan Swearingen, a Michigan Urology resident, recently traveled to Ghana to deliver modern urologic care to under-served areas and provide valuable education Ghanaian urologists.

This trip marked Michigan Urology's fourth trip to Ghana, with the original excursion occurring in 2012.

In addition to the care and education shared with partners in Ghana, the trip served as a valuable opportunity for Michigan Urology's faculty and students to gain unique clinical experience with complex cases.
