

Global Surgery Gives, Global Surgery Takes

Why Build Partnerships Around the World

What's global surgery?

It's building relationships between Michigan Medicine and partners around the world.

It's about giving... and taking

Partnerships are built strategically for maximum impact and mutual benefit.

What we teach, what we learn

Our surgeons share their clinical expertise and learn about different approaches to care.

“

We are fortunate to be where we are and we should be sharing our resources and our knowledge. And we should not be sufficiently arrogant as to think that we have all the answers.

-Dr. Edwin Wilkins”
