

Michigan Surgical Innovation Accelerator Program

MSIA Program

Six month curriculum focused on:

- Accelerating the development of novel ideas
- Commercialize the innovations/ technologies
- Make available for surgical patients

My Weight Loss Journey

Mobile Application:

- App guides patients through the surgery process
- Helps patients maintain their weight loss
- Engages patient through the post-operative period

RETREVA

Specimen Retrieval Device:

- Ease of extraction of large specimens during minimally invasive surgery
- User friendly rupture proof bag
- Ready for prototyping after MSIA

What Is Our Future?

Next Steps for Additional Investments:

- Participation in MI-Pitch Club.
- Larger external funding programs, such as MiTRAC Coulter
- External opportunities through venture capital funding
