#MWSC18 Leading from Your Best Self: How A Vision Became a Reality

Why was the conference important?
• While many conferences center on women in surgery, the Michigan Women’s Surgical Collaborative identified a specific need to engage early and mid-career faculty at a potentially vulnerable time in their career.

What did we learn?
• The conference was comprised of 3 themes: The art of negotiation, building your best self and overcoming adversity.

What did we take away?
• The express goal of the conference was to tailor the “take away” to each attendees needs.
