Program Goals

Standard of care continues to evolve when dealing with cataract surgery and management of corneal disease. Ophthalmologists must be aware of the effectiveness of new tools and surgical techniques. The experts gathered for this conference will stress the newest and most effective ways to approach dry eyes, corneal disease and corneal surgery techniques. Participants will learn about:

- Ocular surface disorders
- Evolving corneal surgical techniques
- Management of ocular infections
- Enhancing outcomes with cataract surgery

Through lectures and open discussion, conference participants can expect to learn about the latest advances in the quickly changing environment that surrounds surgery, as well as the diagnosis and management of corneal diseases. The conference will provide a stimulating learning experience for comprehensive ophthalmologists, cornea specialists, nurses, allied health professionals and ophthalmologists-in-training. Featuring didactic lectures, point/counterpoint discussions and audience interaction, the conference is designed to help participants integrate the tools and techniques discussed into practice. Penny A. Asbell, M.D., FACS, MBA, FARVO, Professor and Chair of Ophthalmology at the University of Tennessee Health Science Center, will deliver the 47th F. Bruce Fralick Lecture.

Educational Objectives

Attendees of this conference will understand and be able to implement:

1. New approaches to diagnosis and management of dry eye disease
2. Understanding of indications and outcomes of corneal surgical techniques
3. Supplemental treatments for ocular infections
4. Optimization of outcomes after cataract surgery
