*If you have this type of funding, remember that on the Financial Aid Office's disbursement calendar, Sept is usually paid out the last week of the month while August pays out at the beginning, resulting in a larger pay gap than usual (an extra 2 weeks or so). Please budget for this annually. Programs cannot pay this out earlier en masse, but if this poses a large problem for you paying bills, please contact CMB and we may be able to advance individual students money, that would then need to be paid back in your student account.

OTHER NOTES:

- 1) Some students may have a combination of these types of awards, so their funding may reflect a combination of these funding situations - contact CMB with questions
- 2) Pay dates listed are Mondays - which are typically the latest possible payment - more likely the payment will disburse the Friday before
