SUBSEQUENT DISSERTATION MEETINGS

Scheduling

*Must be scheduled every 6 months/twice per year* – the student and mentor are responsible for scheduling these meetings, and for telling the CMB office the date and time it will be held.

Keep track of meeting *dates and times*, as the program will request these twice per year.

If meetings are not getting scheduled, the CMB office may automatically schedule the next meeting (same day of the week and same time) 6 months later, and add calendar requests to your committee members’ calendars. If there are conflicts, it is the responsibility of the student and committee to reschedule, ideally ± 2 weeks from the given date.

Lack of progress is not an excuse to delay meeting; rather, it is a compelling reason to have one.

*A student who has not had a committee meeting within a 9-month period will be considered 'not in good standing'.*

The mentor of such a student will not be permitted to accept additional CMB students until this situation is rectified. In special circumstances, a waiver of this rule may be granted by the Director of the CMB Program upon receiving a clear explanation for the delay.

Submission Timeline

*Before Meeting:*

Submit Progress Report to Committee

The student and mentor should discuss the content of the dissertation committee meeting prior to the meeting and the student should provide committee members with a brief written *Progress Report* (1-2 pages) at least 3 days prior to the meeting. The Progress Report should include a brief restatement of the aims, a summary of progress, a discussion of problems encountered and a plan for future work. The plan for future work should be organized in terms of 6-month research goals and longer-term goals. The Progress Report should include a list of the student's publications and abstracts for national/international meetings attended; manuscripts planned, submitted and in preparation should be indicated.

Submit Manuscripts to Committee for Review

Manuscripts accepted for publication should be provided electronically to committee, but students may provide drafts if they would like to have comments from the faculty.

Bring Dissertation Committee Meeting Addendum

The dissertation committee meeting addendum is page 3 of the student’s Semester Report form, which can be found on the [CMB Forms](#) page.

Prepare PowerPoint for meeting

Table of Contents
SUBSEQUENT DISSERTATION MEETINGS (continued)

During Meeting:

Provide PowerPoint to Committee Members

Don’t forget to discuss your career goals, and get advice from the committee (this is a chance for you to get guidance to move your research and career planning forward)

Ask your committee to schedule the next meeting (while you are all together, you might as well – faculty as you know are very hard to schedule!)

Ask your chair to step out of the room at the end of the meeting so you can talk freely with the rest of your committee (this is a CMB policy) – or ask another committee member to remind the group

Ensure the committee fills out the Dissertation Committee Meeting Addendum
This addendum should be filled out by the committee at the student’s meeting and saved to be submitted with the Semester Report for Fall or Winter. The meeting addendum may be reviewed by a director and/or the Program Committee along with the Semester Report.

Format of Meetings:

There is no fixed length for a meeting but in most cases meetings will be 2 hours in length.

- **Research Progress**
  Oral presentation should focus on progress on the specific aims, problems encountered, plans for publication and future research plans – the latter organized in terms of immediate and long-term goals. If results indicate that aims need to be modified or discarded, this should be discussed and new aims may be proposed or recommended.

- **Career Development**
  During the 4th/G3 year and later, time should be reserved at the end for discussion of career goals. The student should include a slide or two in the presentation on this topic.

- **Candidate Timeline**:  
  Student should present a formal timeline for completion of the dissertation research, including realistic estimates for research aims. They should also use the Candidate Timeline document (found on the CMB Forms page) to track their progress in program requirements as well as expectations such as writing research papers for publication and presenting research at meetings.
