Saroja was such an incredible person. Our class gave her a teaching award when we were fourth year residents. The award was as much about what a great teacher she was for us as well as our way of expressing to her how much we loved her and appreciated her.

Aya Kamaya, M.D.
Residency Class of 2004
Saroja Adusumilli, M.D.
The late Saroja Adusumilli, M.D. was a promising young faculty member dedicated to extraordinary patient care. She was an excellent clinical radiologist, capable investigator and outstanding educator. A member of the University of Michigan faculty since September 2002, she was a well-respected authority on magnetic resonance imaging (MRI) and a member of the Department of Radiology’s abdominal imaging group. An alumna of the University of Michigan Radiology residency program, Dr. Adusumilli was elected chief resident by her peers in 2000, an honor reserved for those with leadership potential and clinical skill. After joining the U-M faculty, she became a valuable mentor to the current residents and fellows. At the time of her death, she was assistant professor of Radiology and associate director of the department’s residency program. She was active in research and was interested in MRI of the prostate and MR colonography. Dr. Adusumilli received her medical degree from Case Western Reserve School of Medicine and completed a fellowship at the University of Pennsylvania after her residency at the University of Michigan.

Something Special
“She was something special,” says Dr. Richard Cohan, professor and associate department chair in Radiology. “Although not many patients meet or think about the person who’s responsible for interpreting their medical images, Saroja took that responsibility incredibly seriously, and cared deeply about her patients.”

“Every image was a person to her—a mother, a father, a son—and she tried hard to figure out what was wrong and how to help,” says Dr. Hero Hussain, director of MRI.

“Her selfless dedication to patient care and teaching made her a role model for faculty and trainees alike,” says Dr. N. Reed Dunnick, the Fred Jenner Hodges Professor and Chair of Radiology.

Her colleague Dr. Elaine Cassi adds, “Saroja was a wonderful human being. Her dedication to the Radiology residency, to the Radiology department, to patients, to her colleagues was tremendous, beyond compare. She was an excellent radiologist, an outstanding teacher and most importantly a genuinely caring and compassionate person who always placed the interests of her colleagues, residents, and patients ahead of her own.”

Legacy of Knowledge and Caring
The purpose of the Saroja Adusumilli Endowed Collegiate Professorship in Radiology Fund is to honor the late Saroja Adusumilli, M.D. This fund will be used to establish and support an endowed professorship in her name. The incumbent holding the Professorship shall be a faculty member in the Department of Radiology who exemplifies the high standards of clinical care, the devotion to education and the dedication to research activities exemplified by Dr. Adusumilli.

Endowed professorships create an enormous foundation of strength in academia, offering prestige and stability that can be had no other way. Collegiate professorships, always named for a onetime member of the Medical School faculty, are created by gifts from a group of donors including colleagues, family and friends who wish to honor a faculty member’s extraordinary work.

This Professorship will perpetuate Dr. Adusumilli’s contributions to society as an exemplary physician, teacher, and scientist and ensure that the University of Michigan can continue to attract and retain the nation’s premier radiologists, educators, and investigators; thus continuing forever the Adusumilli legacy of dedication and excellence.

Generations from now, the gratitude felt today by so many for the generosity of spirit that has preceded them by the establishment of the Saroja Adusumilli Collegiate Professorship will be felt anew by others. The good work made possible by this Professorship will continue as part of the great tradition of excellence of the University of Michigan Department of Radiology.
