

# DO YOU HAVE DIABETES? ARE YOU DUE FOR YOUR ANNUAL EYE EXAM?

Your University of Michigan Eye Doctor wants to invite you to take advantage of the latest innovation in eye screening technology at the Kellogg Eye Center.

## IT CAN SAVE YOUR EYES.

Half of diabetics have eye disease and don't know it.

Yearly eye exams are recommended for diabetic patients.

95% of blindness can be prevented with early detection.

## IT IS SAFE.

The camera is FDA approved to screen for diabetic eye disease.

A University of Michigan Ophthalmologist looks at the photos of your eyes.

Your eye exam results are secure and confidential in our electronic medical records.

## IT IS SIMPLE.

A camera takes pictures of your eyes to check for diabetes.

No dilation drops!  
Most eyes do not need to be dilated for the pictures.

The test and visit takes less than 15 minutes.

A NEW ADVANCEMENT IN EYE SCREENING TECHNOLOGY IS BEING DELIVERED TO YOU AT KELLOGG.
